

# Social Dimensions of Disaster Webinar

April 24, 7 p.m.

As a country, we have had to deal with various disaster events in recent years. Many of these events have resulted in wide-spread damage to infrastructure, as well as significant injuries and loss of life. The resulting impact to affected communities has been felt far and wide. The Social Dimensions of Disaster Tuition-Free Webinar will examine the range of social issues communities are likely to encounter before, during, and after a disaster strikes, while exploring proactive strategies for mitigating potential problems.

## Expert Panel
